

SMEs digitalization is Important

In today's digital age, digitalization is essential for SMEs to thrive. It offers significant advantages such as enhanced efficiency, stronger customer relationships, and a competitive edge. Through automation, SMEs can reduce costs, improve transparency, and unlock new innovation possibilities.

Software development is expensive, and choosing the right one from the many existing options is time-consuming and may not be a perfect fit for the company. Additionally, SMEs often lack the experience, and configuring and training software can be challenging.

But it's difficult for an SME

The solution is the Fryda!

Create your corporate software with AI in 1 minute!

Just describe your company in a few sentences, and our AI will automatically generate a customized business system for you!

All necessary functions are available in one software!

Our system offers billing, cost management, customer/supplier management, calendar, inventory management, HR functions, document and contract management, automated reports, numerous AI features, and much more, so you only need to use one software in your day-to-day operations.

Implementing a corporate software can be as easy as installing Facebook on your phone!

Once you've created your app, you can upload it to our app store. Other similar companies can then download it. Introducing a new business software becomes as easy as installing Facebook on your phone and registering for an account. In return, you'll receive 30% of the other company's subscription fee!
